1 Release notes

Chapter(s)	Comments
5.3	DHL PARCEL CONNECT PLUS (112) Section 'Valid countries' updated. Country FR added. Please also see section 'Excluded regions/areas'. Please notice that print API (for labels) and transportInstruction API must be used for shipments to FR for this product.
5.4	DHL ROAD FREIGHT STANDARD (202) - Section 'Product specific' updated. For shipments to/from Greece (GR) it is mandatory to apply VAT number/TIN number for all parties in shipment information (IFTMIN or transportInstruction). More info in this link: https://ec.europa.eu/digital-building-blocks/sites/spaces/DIGITAL/pages/467108887/eInvoicing+in+Greece - Section 'Related fields' updated. Added selection for SENT free (Y or N) for shipments to/from PL. For IFTMIN: Please notice that Y or N for SENT free should be sent in 4440-1. SENT reference and carrier key should be sent in 4440-2 and 4440-3. (These two were earlier sent in 4440-1 and 4440-2.)
5.9	DHL ROAD FREIGHT DIRECT (205) Section 'Related fields' updated. Added selection for SENT free (Y or N) for shipments to/from PL.
	DHL EUROCONNECT PLUS (232) - Product removed. - Customers who use this product today are informed about the removal and should use other products instead (for which they have agreement). If they are lacking agreement for other product, please refer to DHL Freight Customer service or DHL sales representative.
5.10	DHL ROAD FREIGHT PRIORITY (233) - Section 'Minimum and maximum weight and dimensions etc' updated. Max volume (cbm) and Max loading metres (ldm) updated (different values per country). - Section 'Chargeable weight calculation' updated (different values per country). - Section 'Related fields' updated. Added selection for SENT free (Y or N) for shipments to/from PL.

Chapter(s)	Comments
5.11	DHL STANDARD PALLET INTERNATIONAL (SPI) - Section 'Product specific' updated. For shipments to/from Greece (GR) it is mandatory to apply VAT number/TIN number for all parties in shipment information (IFTMIN or transportInstruction). - Section 'Related fields' updated. Added selection for SENT free (Y or N) for shipments to/from PL.
5.13	DHL SERVICE POINT C2B (104) Section 'Product specific' updated. Information concerning QR codes via address https://hamta.dhl.com/ added.
5.15	DHL PARCEL RETURN CONNECT (107) Section 'Instructions' updated concerning QR codes. Use selection <i>"qrCode": true</i> in print API. Valid for countries BE, BG, CZ, DE, ES, LU and PT.
5.19	DHL HOME DELIVERY INTERNATIONAL (601) - Section 'Product specific' updated. For shipments to/from Greece (GR) it is mandatory to apply VAT number/TIN number for all parties in shipment information (IFTMIN or transportInstruction). - Section 'Related fields' updated. Added selection for SENT free (Y or N) for shipments to/from PL.
6.22	EUR Pallet exchange Section 'Code in invoice message' updated. Code "PAL" added.
6.30	Green Freight > GoGreen Plus* - Name/definition of additional service changed from Green Freight (and Skicka Grönt) to GoGreen Plus*. - Please see separate information below for general information concerning this update. - Section 'Service specific' added, with information about mandatory disclaimer to be displayed in user interfaces. - Section 'Codes on label' updated. No logo or text should be printed on the label for this additional service. PLEASE NOTICE: THIS UPDATE IS VALID IMMEDIATELY

Chapter(s)	Comments
Green Freight >>> GoGreen Plus	On September 27th, the EU's new Empowering Consumers legislation will take effect. Its purpose is to reduce so-called greenwashing and to strengthen consumers' ability to understand the often complex field of sustainability. As a result, we need to rename our value-added service Green Freight/Skicka Grönt to DHL's global service name GoGreen Plus*, accompanied by an explanatory text, i.e. a disclaimer. This disclaimer must always be clearly visible in close proximity to the value-added service name. In addition, this value-added service must not be marketed or communicated to consumers in any way. The name change will take effect on 27 September 2026. We recognize that the notice period is short and appreciate your understanding and support in implementing this change as soon as possible. Besides the name change of the service, symbol/logo or text on labels must be removed. Today a specific symbol with text "SKICKA GRÖNT MED DHL" or plain text "SKICKA GRÖNT" is printed on the label. This must be removed. No such text should be printed on label. Name change to GoGreen Plus* and removal of label text affects the following transport products: 102, 112, 209, 210, 211, 212, 103, 104, 107, 118, 401, 402 and 502. <u>Disclaimers in English and Swedish:</u> *GoGreen Plus in Sweden is a value-added service to a DHL shipment contributing to decarbonization measures within DHL's logistics network. By using alternative fuels and/or technologies DHL reduces the usage of fossil fuels in the mode of transport used for the GoGreen Plus shipment. This does not necessarily mean that the specific shipment is physically transported with the assets using these fuels or technologies. Further information, e.g. on concrete decarbonization measures is available at Sustainability - DHL Freight - Sweden. *GoGreen Plus i Sverige är ett tillval för DHL-sändningar som bidrar till utsläppsminskande åtgärder inom DHL:s logistiknätverk. Genom investeringar i alternativa bränslen och/eller teknologier minskar DHL användningen av fossila bränslen i transporter för Go Green Plus-sändningar. Detta innebär inte nödvändigtvis att den enskilda sändningen transporteras eller hanteras med just dessa bränslen eller teknologier. Mer information om GoGreen Plus och de konkreta åtgärder för utsläppsreduktion som tjänsten stödjer finns på Hållbarhet - DHL Freight - Sverige.

Chapter(s)	Comments
9.4.2	Label section 6 Sender phone number - DHL SERVICE POINT C2B (104) Due to GDPR and security regulations, it is not allowed to print sender phone number on labels for this product.

2 Purpose of this document

The purpose of this document is to describe features and attributes for road based products for DHL Freight (Sweden). There are different limitations when it comes to business segment (B2B or B2C), geographical coverage, min and max weight, dimensions etc. Different additional services can be selected depending on transport product.

3 Versions of this document - dhldashboard.se

There are no fixed release plans for this document. An updated version will be published when changes in product features are done or when products are added or removed.

The latest version can always be found at www.dhldashboard.se.

Here you can also find Version history for the Product manual, EDI specifications, API models and other relevant information.

4 Scope

This manual covers the information needed for booking information (pickup request), transport instruction (shipment information) and mandatory documents. For information exchange, please see separate documentation and EDI message specifications.

4.1 *Related documentation*

Please notice that this document is only a summary of details concerning our products, additional services etc.

For more detailed products and services information - please visit DHL Freight website.

Most important is the latest version of "DHL Freight Sweden Terms and conditions" (English) or "DHL Freight Sweden Uppdragsvillkor" (Swedish).

It is highly recommended that this is read as a complement to this document.

5 Description of products

5.1 *Products overview*

Code	Product	Domestic or International
	B2B	
102	DHL PAKET	Domestic
112	DHL PARCEL CONNECT PLUS	International
202	DHL ROAD FREIGHT STANDARD	International
209	DHL SPECIAL	Domestic (B2B and B2C)
210	DHL PALL	Domestic
211	DHL STYCKE	Domestic
212	DHL PARTI	Domestic
205	DHL ROAD FREIGHT DIRECT	International
233	DHL ROAD FREIGHT PRIORITY	International
SPI	DHL STANDARD PALLET INTERNATIONAL	International

[Additional services overview](#)

5.2 **DHL PAKET (102)**

	Product codes						Link to Products overview					
Domestic Sweden	102	209	210	211	212	103	104	118	401	402	502	
International	112	202	205		233	SPI		109	107	601		

Minimum and maximum weight and dimensions etc			DHL PAKET (102)
	Piece	Shipment	
Max number of pieces	-	99	
Min actual weight (kg)	0,1	-	
Max actual weight (kg)	35,0	150,0	
Min dimensions, L x W x H (cm)	15 x 11 x 2	-	
Max dimensions, L x W x H (cm)	150 x 50 x 50	-	
Max length + circumference (cm)	-	-	
Max volume (cbm)	0,375	0,535	
Max loading metres (ldm)	-	-	
Max no. of pallet places (ppl)	-	-	
Max chargeable weight (kg)	-	150,0	
The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package. Chargeable weight is the greater of the actual weight of the goods and the volumetric weight. Chargeable weight per package is rounded up to the nearest whole kg.			

Chargeable weight calculation			DHL PAKET (102)
1 cubic metre (cbm) equals 280 kg			

Number of decimals					DHL PAKET (102)
Weight	Volume	Loading metre	Pallet place	Dimensions (cm)

Domestic Sweden	102	209	210	211	212	103	104	118	401	402	502	
International	112	202	205		233	SPI		109	107	601		

Minimum and maximum weight and dimensions etc		DHL ROAD FREIGHT STANDARD (202)
	Piece	Shipment
Max number of pieces	-	999
Min actual weight (kg)	0,1	-
Max actual weight (kg)	1000,0	2499,9
Min dimensions, L x W x H (cm)	15 x 11 x 3	-
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	299 x 240 x 220	-
Max length + circumference (cm)	-	-
Max volume (cbm) DK, FI, NO GB, IE Other countries	-	7,142 6,944 7,507
Max loading metres (ldm) DK, FI, NO GB, IE Other countries	-	1,24 1,24 1,35
Max no. of pallet places (ppl)	-	-
Max chargeable weight (kg)	-	2499,9

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight calculation

DHL ROAD FREIGHT STANDARD (202)

	1 cubic metre (cbm) equals	1 loading metre (ldm) equals

Product specific

DHL ROAD FREIGHT STANDARD (202)

- This product can be used to and from Sweden.
- Minimum and maximum weight and dimensions varies, depending on destination country. Please see table above.
- Partloaded groupage/Direct injection (spridning) is a way of bulking consignments together. Only valid within the Nordic region. All shipments must be sent in one EDI file, with a dedicated EDI sender.
- For shipments to/from Greece (GR) it is mandatory to apply VAT number/TIN number for all parties in shipment information (IFTMIN or transportInstruction).
- Code for product in invoice files: ECI.

Instructions

DHL ROAD FREIGHT STANDARD (202)

- Addressing to country Ireland (IE): If county is used, this should be sent in field for postal code.
- Documents needed to carry out the transport, such as DGD/IMDG, customs documents, invoices etc must be sent by e-mail to dhlfreight.int.se@dhl.com.
- Booking cancellation cannot be done electronically.

Max number of pieces	-	99	
Min actual weight (kg)	0,1	-	
Max actual weight (kg)	1000,0	2500,0	
Min dimensions, L x W x H (cm)	15,0 x 11,0 x 3,5	-	
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	If weight is <50 kg: L: 599 W: 240 H: 220 If weight is ≥50 kg: L: 299 W: 240 H: 220	-	
Max length + circumference (cm)	-	-	
Max volume (cbm)	3,571	8,928	
Max loading metres (ldm)	0,51	1,28	
Max no. of pallet places (ppl)	1,2	3,2	
Max chargeable weight (kg)	-	2500,0	

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

If pallet place (pallplats) is used for volumetric weight calculation, 1 ppl equals 0,4 ldm.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation

DHL STYCKE (211)

1 cubic metre (cbm) equals 280 kg	1 loading metre (ldm) equals 1950 kg	1 pallet place (ppl) equals 780 kg
--------------------------------------	---	---------------------------------------

Long goods chargeable weight calculation

DHL STYCKE (211)

A piece is calculated as long goods if length is 300 - 599 cm & weight is <50 kg.

	Piece width (cm)	Volumetric weight (kg)
	1 - 40 cm	200 kg
	41 - 80 cm	400 kg
	81 - 120 cm	600 kg
	121 - 160 cm	800 kg
	161 - 240 cm	900 kg

Example: If width is 140 cm and length is 300 - 599 cm, the volumetric weight is 800 kg.

Number of decimals

DHL STYCKE (211)

Weight	Volume	Loading metre	Pallet place	Dimensions (cm)
1	3	2	1	0

Product specific

DHL STYCKE (211)

- Default product for shipments >999,0 kg - DHL PARTI.
- If a shipment contains one or more pieces with height >220 cm it should be handled as a DHL PARTI (212) shipment, even if total weight is less than 1000,0 kg.
- A piece is calculated as long goods if length is 300 - 599 cm.

5.8 DHL PARTI (212)

Product codes						Link to Products overview						
Domestic Sweden	102	209	210	211	212	103	104	118	401	402	502	
International	112	202	205		233	SPI		109	107	601		

Minimum and maximum weight and dimensions etc			DHL PARTI (212)
	Piece	Shipment	
Max number of pieces	-	999	
Min actual weight (kg)	0,1	-	
Min chargeable weight (kg)	-	1000,0	
Max actual weight (kg)	-	-	
Min dimensions, L x W x H (cm)	-	-	
Max dimensions, L x W x H (cm)	1200 x 240 x 270	-	
Max length + circumference (cm)	-	-	
Max volume (cbm)	-	150,000	
Max loading metres (ldm)	-	19,2	
Max no. of pallet places (ppl)	-	48,0	
The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package. Chargeable weight is the greater of the actual weight of the goods and the volumetric weight. Chargeable weight per package is rounded up to the nearest whole kg. For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter. For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter. The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4. If pallet place (pallplats) is used for volumetric weight calculation, 1 ppl equals 0,4 ldm. Chargeable weight might also be calculated according to long goods calculation rules for the product.			

Chargeable weight calculation			DHL PARTI (212)
1 cubic metre (cbm) equals 280 kg	1 loading metre (ldm) equals 1950 kg	1 pallet place (ppl) equals 780 kg	

Long goods chargeable weight calculation

DHL PARTI (212)

A piece is calculated as long goods if length is ≥ 300 cm & weight ≥ 50 kg or if length is ≥ 600 cm.

	Piece width (cm)	Kg per length metre
	1 - 40 cm	325 kg per metre
	41 - 80 cm	650 kg per metre
	81 - 120 cm	975 kg per metre
	121 - 160 cm	1300 kg per metre
	161 - 240 cm	1950 kg per metre

Examples: If width is 140 cm and length is 400 cm & weight is 100 kg, the volumetric weight is 4,0 m x 1300 kg = 5200 kg.

If width is 70 cm and length is 700 cm, the volumetric weight is 7,0 m x 650 kg = 4550 kg.

Number of decimals

DHL PARTI (212)

Weight	Volume	Loading metre	Pallet place	Dimensions (cm)
1	3	2	1	0

Product specific

DHL PARTI (212)

- Maximum weight per piece and shipment is limited by the loading capacity of the truck and of the allowed maximum weight for the road.
- A piece is calculated as long goods if length is ≥ 300 cm and weight is $\geq 50,0$ kg or if length is ≥ 600 cm.
- In pickup request EDI message the following information is mandatory for DHL PARTI (212) shipments:
 - Complete name and address to physical pickup place.
 - At least address, postal code and city to physical delivery place.
 - Freight payer party including paying DHL account number.

GB, IE		1,24
Other countries		1,35
Max no. of pallet places (ppl)	-	-
Max chargeable weight (kg)	-	2499,9

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight calculation

Product specific

DHL STANDARD PALLET INT (SPI)

- Package (pallet) types can be mixed, as long as maximum loading metres do not exceed 2,0 ldm. For this calculation, a piece of each package (pallet) type equals:
1 PLH = 0,2 ldm
1 PLE = 0,4 ldm
1 PAL = 0,5 ldm
Please notice that user must not actually enter/use any ldm values - this calculation should be made anyway "in the background".
- This product can be used to and from Sweden.
- For shipments to/from Greece (GR) it is mandatory to apply VAT number/TIN number for all parties in shipment information (IFTMIN or transportInstruction).
- Code for product in invoice files: SPI.

Instructions

DHL STANDARD PALLET INT (SPI)

- Addressing to country Ireland (IE): If county is used, this should be sent in field for postal code.
- Documents needed to carry out the transport, such as DGD/IMDG, customs documents, invoices etc must be sent by e-mail to dhlfreight.int.se@dhl.com.

Product specific

DHL SERVICE POINT B2C (103)

- The delivery of the package can be carried out as follows:
 1. Picked up by receiver at a parcelshop (SERVICE POINT).
 2. Picked up by receiver at a parcelstation (box), accessed using a code.
- When the shipment is ready for pickup a notification will be sent to the consignee. It is mandatory to select either sms or e-mail to notify the consignee. Please notice that this should not be selected by adding an additional service. Mobile phone number or e-mail address must be sent according to EDI file specification. Please notice that the consignee will be notified by sms if both mobile phone number and e-mail address is sent. I.e. notification will not be sent by e-mail in that case.
- Maximum dimensions varies depending on delivery method. Please see tables above.
- To enable the receiver to return a package, a separate DHL SERVICE POINT C2B (104) shipment must be created.

Product specific	DHL PARCEL CONNECT (109)
- Addressing can be made in two different ways depending on possibilities in delivery country: 1. Residential (home) addressing. 2. Access point (parcelshop or parcelstation/box) addressing. Please notice that selected addressing and actual delivery method may not have to correspond. E.g. if residential addressing is the only possible option, the delivery may still be done to a parcelshop or parcelstation. In some cases the consumer (receiver) can choose to have the delivery made to an access point even if addressing is made to residential (home) address. This option is handled in the pre-advice message that is sent after arrival to the receiving country. Please see appendix. - Minimum and maximum weight and dimensions varies depending on destination country and delivery method. Please see appendix. - The receiver is notified via e-mail and/or a text message. Possible pre-alert method varies depending on destination country and delivery method. Please see appendix. - Please notice that e-mail address to receiver is mandatory regardless of pre-alert method. - To enable the receiver to return a package, a separate DHL PARCEL RETURN CONNECT (107) shipment must be created. - The routing code that is written on the label (destination coded routing information) must also be transmitted as a specific reference in shipment instruction EDI file. In EDI file IFTMIN this should be sent in Sg 3 RFF with 1153=RC (please also see EDI specifications).	

Instructions	DHL PARCEL CONNECT (109)
• Addressing to country Ireland (IE): Eircode (7 characters) should be sent in field for postal code. If county is used, this should be sent in the same field as city (separated with comma character), e.g. CITY, COUNTY. • Documents needed to carry out the transport, such as customs documents, invoices etc must be sent by e-mail to dhlfreight.int.se@dhl.com. • Two copies of customs documents must also be attached on the outside of the package. • Booking cancellation cannot be done electronically.

5.15 DHL PARCEL RETURN CONNECT (107)

Product codes						Link to Products overview						
Domestic Sweden	102	209	210	211	212	103	104	118	401	402	502	
International	112	202	205		233	SPI		109	107	601		

Product specific

DHL PARCEL RETURN CONNECT (107)

- The routing code that is written on the label (destination coded routing information) must also be transmitted as a specific reference in shipment instruction EDI file (please see EDI specifications).

Instructions

DHL PARCEL RETURN CONNECT (107)

This product can only be used when a DHL PARCEL CONNECT (109) shipment is to be returned to the original sender. The following preparations has to be performed:

- A separate shipment with product DHL PARCEL RETURN CONNECT (107) has to be created.
- This shipment should contain a unique domestic Swedish shipment number and a unique License plate.
- The consignee/delivery address does not have to be equal to the sender address in the corresponding DHL PARCEL CONNECT (109) shipment.
- If the shipment is to be returned from/to a non-EU country, a return form/proforma invoice has to be provided for customs purposes.
- The shipment instruction has to be sent to DHL via API or EDI. The data is then stored in our system for 180 days. If the package is not returned, the information will be removed.

Return label and/or QR code to the person sending the return shipment

There are several options to provide the return sender with information and/or return label.

- A return label can be printed and sent, preferably bi-packed in the original package (i.e. the DHL PARCEL CONNECT (109) shipment).
- In order to guide the consumer (sender), a brief instruction in local language should be printed on the label in section 16 'Customer Information'. This is valid for some countries. Please see label section for texts to use per country.
- An alternative to use pre printed return labels is to provide a QR code, by using our print API. The code can be printed or sent electronically. The QR code must be shown when handing the return parcel. Use selection "*qrCode*": *true* in print API. Valid for countries BE, BG, CZ, DE, ES, LU and PT.

5.17 **DHL HOME DELIVERY (401)**

Product codes						Link to Products overview						
Domestic Sweden	102	209	210	211	212	103	104	118	401	402	502	
International	112	202	205		233	SPI		109	107	601		

Minimum and maximum weight and dimensions etc		DHL HOME DELIVERY (401)
	Piece	Shipment
Max number of pieces	-	99
Min actual weight (kg)	0,1	-
Max actual weight (kg)	800,0	2500,0
Min dimensions, L x W x H (cm)	15,0 x 11,0 x 3,5	-
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	If weight is <50 kg: L: 599 W: 240 H: 220 If weight is ≥50 kg: L: 299 W: 240 H: 220	-
Max length + circumference (cm)	-	-
Max volume (cbm)	3,571	8,928
Max loading metres (ldm)	0,51	1,28
Max no. of pallet places (ppl)	1,2	3,2
Max chargeable weight (kg)	-	2500,0

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

If pallet place (pallplats) is used for volumetric weight calculation, 1 ppl equals 0,4 ldm.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation

DHL HOME DELIVERY (401)

1 cubic metre (cbm)
equals 280 kg

1 loading metre (ldm)
equals 1950 kg

1 pallet place (ppl)
equals 780 kg

Long goods chargeable weight calculation

DHL HOME DELIVERY (401)

A piece is calculated as long goods if length is 300 - 599 cm & weight is <50 kg.

	Piece width (cm)	Volumetric weight (kg)
	1 - 40 cm	200 kg
	41 - 80 cm	400 kg
	81 - 120 cm	600 kg
	121 - 160 cm	800 kg
	161 - 240 cm	900 kg

Example: If width is 140 cm and length is between 300 - 599 cm, the volumetric weight is 800 kg.

Number of decimals

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight calculation

DHL HOME DEL INTERNATIONAL (601)

	1 cubic metre (cbm) equals	1 loading metre (ldm) equals
Countries DK, FI and NO	350 kg	2000 kg
Countries GB and IE	360 kg	2000 kg
Other countries	333 kg	1850 kg

Number of decimals

DHL HOME DEL INTERNATIONAL (601)

Weight	Volume	Loading metre	Pallet place	Dimensions (cm)
1	3	2	-	0

Product specific

DHL HOME DEL INTERNATIONAL (601)

- This product can be used to and from Sweden.
- Minimum and maximum weight and dimensions varies, depending on destination country. Please see table above.
- Partloaded groupage/Direct injection (spridning) is a way of bulking consignments together. Only valid within the Nordic region. All shipments must be sent in one EDI file, with a dedicated EDI sender.
- Phone number and e-mail address to consignee are mandatory.
- For shipments to/from Greece (GR) it is mandatory to apply VAT number/TIN number for all parties in shipment information (IFTMIN or transportInstruction).
- Code for product in invoice files: HDI.

Instructions

DHL HOME DEL INTERNATIONAL (601)

- Addressing to country Ireland (IE): If county is used, this should be sent in field for postal code.
- Documents needed to carry out the transport, such as DGD/IMDG, customs documents, invoices etc must be sent by e-mail to dhlfreight.int.se@dhl.com.
- Booking cancellation cannot be done electronically.

6.30 GoGreen Plus*

Swedish	GoGreen Plus*
---------	---------------

Service is valid for the following highlighted prod											<i>Link to Products overview</i>	
Domestic Sweden	102	209	210	211	212	103	104	118	401	402	502	
International	112	202	205		233	SPI		109	107	601		

Service specific
The following explanatory text (disclaimer), in appropriate language (or both), must be displayed in user interface when the additional service is selectable: *GoGreen Plus in Sweden is a value-added service to a DHL shipment contributing to decarbonization measures within DHL's logistics network. By using alternative fuels and/or technologies DHL reduces the usage of fossil fuels in the mode of transport used for the GoGreen Plus shipment. This does not necessarily mean that the specific shipment is physically transported with the assets using these fuels or technologies. Further information, e.g. on concrete decarbonization measures is available at Sustainability - DHL Freight - Sweden. *GoGreen Plus i Sverige är ett tillval för DHL-sändningar som bidrar till utsläppsminskande åtgärder inom DHL:s logistiknätverk. Genom investeringar i alternativa bränslen och/eller teknologier minskar DHL användningen av fossila bränslen i transporter för Go Green Plus-sändningar. Detta innebär inte nödvändigtvis att den enskilda sändningen transporteras eller hanteras med just dessa bränslen eller teknologier. Mer information om GoGreen Plus och de konkreta åtgärder för utsläppsreduktion som tjänsten stödjer finns på Hållbarhet - DHL Freight - Sverige.

---------------------------------	--	--------------------------------

7 Customs

7.1 The parts of Customs

The Customs proceedings consists of a declaration in the land of departure (export declaration) and a declaration in the land of delivery (import declaration). The declarations are based on the financial transaction between the exporter and the buyer of the goods; i.e. the invoice. These declarations may be carried out by the customers themselves or by an agent e.g. DHL.

7.2 Contents of declaration

The declarations shall state name/number, date, amount and currency of the invoice. It shall also be stated if the invoice is used for payment (commercial) or for customs purposes only (pro forma).

Further the declaration shall state the country of origin of the goods and a procedure code to declare if this is a standard export or if the goods have been imported before (there are a number of different procedures). The declaration must contain at least one customs tariff number and specified net weight.

7.3 Id and trace of declaration

Each shipment declared is given a certain id to be used by customs (Customs id/Customs declaration number).

7.4 Countries and regions affected

For all shipments to be delivered outside the European Union, or the tax area, customs proceedings are mandatory.

Countries where DHL Freight delivers outside the European Union are CH, GB, GE, GI, LI, MK, NO, RS, RU, SM, TR and UA. Examples of areas outside the tax area are Åland Islands (FI 22) and Canary Islands.

Goods may be imported from other countries and held at storage without an import declaration. The declaration may be performed at the time of the delivery, hence a shipment that appears to be a domestic consignment or a delivery within the European Union, might actually be subject to customs proceedings.

7.5 Feature code (routing barcode) on label

The labels provided for a shipment where customs proceedings are mandatory must contain the routing barcode dedicated for customs handling.

7.6 Services provided by DHL Freight

When payer code Incoterm DDP or Combiterm 023 (the commercial invoice should state corresponding delivery term, e.g. Incoterm DDP) is used DHL can provide the service of declaration both in the land of departure and the land of delivery.

If payer code Incoterm CPT, CIP, DAP, DPU or Combiterm 022 (the commercial invoice should state corresponding delivery term, e.g. Incoterm DAP) is used DHL can provide the service of declaration in the land of departure.

The responsibility of the import declaration then falls on the Buyer of the goods in the land of delivery.

7.6.1 Customs handling - Overall instruction (for applications)

In the booking/shipment flow the service needs to be shown first. No pre-option.

The "Customs document details" and "Customs item information" fields used for additional service "Customs handling - Standard" should not be shown for user unless this service is selected.

Procedure selection of Standard- or Särskilt förfarande export, where Standard should be pre-selected.

Customs handling (Standard or Full service) must be selected when exporting to or importing from the following countries or regions:

CH, GB, GE, GI, LI, MK, NO, RS, RU, SM, TR, UA or FI with zip code 22.

7.6.2 Customs handling - Standard

This service is available if the customer provides all data necessary in the EDI file. A copy of the invoice must still be sent to DHL Freight. For details, please see additional service description.

7.6.3 Customs handling - Full service

If the customer wishes DHL to create the declaration without details in EDI file, it is possible to just send a copy of the invoice to DHL and let DHL do the rest. For details, please see additional service description.

7.6.4 Customs, joint declaration

Several shipments may be declared together, if the customer provides DHL with a summary invoice. A copy of the summary invoice must be sent to DHL. NB this service is only available for customers approved in advance. For details, please see additional service description.

Please note that for bulk-split solution - Parcel Connect (109) and/or Parcel Connect Plus (112) - product DHL PALL (210) is used for the bulk shipment. In this case use fixed delivery address:

BULK-SPLIT NORGE
Importgatan 27
422 46 Hisings Backa

7.6.5 Customs, customers own declaration

If the customer declares directly to customs or by another agent they need only to provide a customs id/customs declaration number via EDI and send a copy of the invoice. For details, please see additional service description.

8 Shipment- and package identifiers

8.1 *Calculation of check digit for License plate (SSCC GS1-128)*

Example Serial Shipping Container Code: 37399999123456789?

Begin by adding every second digit from the right.

Multiply the sum with 3.

$$\begin{array}{cccccccccccccccc} 3 & 7 & 3 & 9 & 9 & 9 & 9 & 9 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 \\ 3 & + & 3 & + & 9 & + & 9 & + & 1 & + & 3 & + & 5 & + & 7 & + & 9 & = & 49 & \times & 3 & = & 147 \end{array}$$

Add the rest of the digits.

$$7 + 9 + 9 + 9 + 9 + 2 + 4 + 6 + 8 = 54$$

Add both sums.

$$147 + 54 = 201$$

Subtract the total sum (201) from nearest higher 10th fraction, in this case 210.

$$\text{Solution: } 210 - 201 = 9$$

The check digit in this example is 9. (In case the sum is 10, the check digit is 0.)

The complete SSCC in this example is **373999991234567899**.

When SSCC is written in plain text, i.e. on labels, an application identifier (AI) should be added.

The application identifier for SSCC is (00).

Including AI, the complete code to be printed is (00)373999991234567899.

Please notice that the AI should NOT be included in the EDI file. It should only be printed on labels (in the barcode and plain text).

8.2 *Calculation of check digit for Swedish shipment Id*

Example shipment Id: 950048673?

Multiply the individual numbers in the shipment Id, all odd is multiplied with 2 and all even with 1.

Shipment Id		9	5	0	0	4	8	6	7	3
Multiples	x	2	1	2	1	2	1	2	1	2
Sums	=	18	5	0	0	8	8	12	7	6

Sum up all individual numbers. Notice that i.e. 18 should be treated as 1 + 8.

$$1 + 8 + 5 + 0 + 0 + 8 + 8 + 1 + 2 + 7 + 6 = 46$$

Subtract the total sum from the nearest higher 10th fraction, in this example 50.

$$50 - 46 = 4$$

The check digit in this example is 4. The complete shipment Id is **9500486734**.

When shipment Id is written in plain text (on documents and labels) it should be in format 950 048 673 4.

9 Transportation documents

Different documents are required for transportation. Most documents can be printed by using our print API.

9.1 Domestic waybill

A standard waybill (SIS) is mandatory for non terminal based products in Sweden. Users should always have the possibility to print a copy of the waybill for their own purposes. Please see section 'Documents' for each product.

9.2 CMR - Convention relative au contrat de transport international de marchandise par route

A standard international waybill (CMR) is mandatory for non terminal based products outside Sweden. Users should always have the possibility to print a copy of the waybill for their own purposes.

9.3 End-of-day manifest / Shipment list

End-of-day manifest should be printed for terminal based products. Please see section 'Documents' for each product. If shipment instruction is sent to DHL via EDI/API the manifest does not have to include all shipment details. Please see appendix for example of layout and content.

9.4 Label

The label contains information of sender/pickup and destination. It also contains information of identification (barcodes), routing, additional services and information relevant for sorting and handling.

[Back to Content](#)

9.4.1 Label layout and content

Header	1	2	3	10 mm

9.4.2 Description of fields on label

The first column shows an indicator if the field is M=Mandatory, C=Conditional or O=Optional.

	Section	Comments	
	General	Use a clear font type like Arial, Courier, Helvetica or equal. Do not use italic, underlining or any other irregularity. Use black color characters on white background.	
C	1 CMR symbol	CMR logo (Convention on the Contract for the International Carriage of Goods by Road) is mandatory for all road transport between the European countries. If the printer does not support graphics, the letters 'CMR' can be printed as text. For domestic shipments within Sweden the following text may be written instead: INRIKES SVERIGE	
M	2 Transport product	DHL transport product with block letters. 102 DHL PAKET 103 DHL SERVICE POINT 104 SERVICE POINT RETUR 107 PARCEL RETURN CONNECT 109 DHL PARCEL CONNECT 112 PARCEL CONNECT PLUS Shipments to DE and IE: DHL PAKET (CONNECT) 118 DHL HEMLEVERANS PAKET 202 DHL ROAD FREIGHT STANDARD or ROAD FREIGHT STANDARD 209 DHL SPECIAL 210 DHL PALL 211 DHL STYCKE 212 DHL PARTI 205 DHL ROAD FREIGHT DIRECT or ROAD FREIGHT DIRECT 233 DHL ROAD FREIGHT PRIORITY or ROAD FREIGHT PRIORITY 401 DHL HOME DELIVERY 402/502 HOME DELIVERY RETURN 601 DHL HOME DELIVERY INT SPI DHL STANDARD PALLET Font size: Minimum 5 mm.	
M	3 DHL Logo	Black and white DHL logo shall be used.	

	Section	Comments
M	4 Sender address	Consignor or pickup party name and address details. Font size: 2 mm.
C	5 Sender DHL account number	Consignor DHL account number. Heading: Account no. Font size: 2 mm.
C	6 Sender phone number	Consignor or pickup party phone number. Heading: Phone no. Font size: 2 mm.
C	VOEC Id	If VOEC apply then VOEC Id must be printed/written on package. Heading: VOEC Font size: 2 mm.
M	6 Sender phone number DHL SERVICE POINT C2B (104)	Due to GDPR and security regulations, it is not allowed to print sender phone number on label for product 104.
C	6 Sender phone number DHL PARCEL RETURN CONNECT (107)	Due to GDPR and security regulations, it is <u>not allowed</u> to print sender phone number on label for product 107 from the following countries: AT, BE, BG, CZ, DE, DK, EE, ES, FI, FR, HR, HU, IE, IT, LT, LU, LV, NL, NO, PL, PT, RO, SI For shipments from the following countries it is <u>mandatory</u> to print sender phone number on label for product 107: SK
M	6 Sender phone number DHL HOME DELIVERY RET (402/502)	Due to GDPR and security regulations, it is not allowed to print sender phone number on label for product 402/502.
M	7 Receiver address	Consignee or delivery party name and address details, including country name in plain text on last row. Valid for all products: This field must be surrounded by marked corners, with the following characteristics: Line thickness: 1,0 mm. Line length: 10 mm. Quiet zone between address and corners: 5 - 10 mm. Font size: 3 mm.

	Section	Comments
M	7 Receiver address DHL SERVICE POINT B2C (103)	Consignee name via SP <i>"name"</i> <i>"street"</i> <i>"postalCode"</i> <i>"cityName"</i> SVERIGE Text 'via SP' to be set by default. SERVICE POINT/Access point (parcelshop or parcelstation) details has to be acquired from ServicePointLocator API.
M	7 Receiver address DHL PARCEL CONNECT (109)	<u>Shipments addressed to residential address (home address):</u> Consignee name and address details, including country name (in English): Name (c/o name) Street address Postal code and City Country (in English) <u>Shipments addressed to parcelshop or parcelstation:</u> The addressing should contain the following information from ServicePointLocator API response: Consignee name <i>"name"</i> <i>"id"</i> <i>"shopName"</i> <i>"street"</i> <i>"postalCode"</i> <i>"cityName"</i> <i>"countryCode"</i> (country name in English must be written) For shipments to country DE, <i>"shopName"</i> and <i>"street"</i> should not be printed. If the text from name, id and shopName is too long to be printed on one row, the name has to be truncated. It is not allowed to print an additional row.
M	7 Receiver address Additional service Collection at terminal	Consignee name <i>c/o DHL Terminal Name</i> <i>DHL Terminal Address</i> <i>DHL Terminal Postal code and City</i> <i>DHL Terminal Country</i> Text 'c/o' to be set by default. DHL Terminal details has to be acquired from Terminal API.

	Section	Comments
C	8 Receiver DHL account number or id	Consignee DHL account number. Heading: Account no. DHL account number mandatory for C2B products (104, 107, 402, 502). Valid for all products: Font size: 2 mm.
C	9 Receiver phone number	Consignee or delivery party phone number. Heading: Phone no. Font size: 2 mm.
M	9 Receiver phone number DHL SERVICE POINT B2C (103)	Phone number to receiving parcelshop (SERVICE POINT). Heading: Phone no. Font size: 2 mm.
C	9 Receiver phone number DHL PARCEL CONNECT (109) and DHL PARCEL CONN PLUS (112)	Due to GDPR and security regulations, it is <u>not allowed</u> to print receiver phone number on label for product 109 to the following countries: AT, BE, BG, CZ, DE, DK, EE, ES, FI, FR, HR, HU, IE, IT, LT, LU, LV, NL, NO, PL, PT, RO, SI For shipments to the following countries it is <u>mandatory</u> to print receiver phone number on label for product 109: SK
M	9 Receiver phone number DHL HEMLEVERANS PAKET (118)	Due to GDPR and security regulations, it is not allowed to print receiver phone number on label for product 118.
M	9 Receiver phone number DHL HOME DELIVERY (401)	Due to GDPR and security regulations, it is not allowed to print receiver phone number on label for product 401.

	Section	Comments	
	9 Weight icon for DHL PARCEL CONNECT (109) and DHL PARCEL CONNECT PLUS (112) shipments to DE (over 10 kg)	From January 1st 2025 it is mandatory to print a weight icon on parcels with weight over 10 kg when destination country is Germany (DE). There are two different icons. One for parcels over 10 kg and one for parcels over 20 kg. Minimum size of symbol: 10 x 10 mm. Symbol should be placed to the right of the receiver address, outside the address corners (please see label section 7) and aligned with the lower address corner. Quiet zone: minimum 1 mm around icon and 3 mm to address corners. (As no phone number to receiver should be printed on labels to DE - please see above - there should be space for this symbol where phone number is normally printed.)	
	Icons	> 10 kg and <= 20 kg 	> 20 kg 
C	10 Manual sort instruction	Swedish domestic routing code (linjekod), with heading 'SE Domestic routing'. For export shipments the domestic routing code must be assigned to match the DHL gateway used for the export. The routing code can be up to 10 characters. The routing code can be acquired from PostalCode API (Route/Gateway). Routing code is <u>mandatory for the following products</u> : DHL PAKET (102) DHL SERVICE POINT B2C (103) DHL SERVICE POINT C2B (104) DHL PARCEL RETURN CONNECT (107) DHL PARCEL CONNECT (109) DHL PARCEL CONNECT PLUS (112) DHL HEMLEVERANS PAKET (118) DHL SPECIAL (209) DHL PALL (210) DHL STYCKE (211) DHL HOME DELIVERY (401) DHL HOME DELIVERY RETURN (402/502) Font size: Minimum 5 mm.	

	Section	Comments
C	11 Product features / Handling code	Codes connected to product features or additional services, white text on black background (reverse video). Valid for all products: If more than one feature/service is selected, a dash sign (-) has to be used as divider, e.g. AVI - LEV. If there is not enough space for codes/text to be used on one row it is ok to add another row. An alternative is to end the row with a plus sign (+) to indicate there are codes missing. Font size: Minimum 5 mm.
C	11 Product features / Handling code DHL PARCEL CONNECT PLUS (112)	Default text per country. Font size row 1: Minimum 5 mm. Font size row 2: Minimum 3 mm. Shipments to FI Express paketti 14 Palautukset lähetetään: DHL Freight, PL 7540, 00002 Helsinki Shipments to EE, LT, LV Express Business Day parcel 14 Returns: DHL Freight, PL 7540, 00002 Helsinki Shipments to DK 332 - Business Parcel Bulk Retur sendes til DHL Freight, Flansbjergsv. 10, SE-232 91 ARLÖV Shipments to other countries: No specific product feature/handling code.
M	11 Product features / Handling code DHL ROAD FREIGHT PRIORITY (233)	Default text: PRIO Font size: Minimum 5 mm. PRIO Please also see section 11b.
M	11 Product features / Handling code DHL PARCEL RETURN CONNECT (107)	Shipments from FR must have the following default text: REVERSE HUB 18 Font size: Minimum 5 mm. REVERSE HUB 18

	Section	Comments
M	11 Product features / Handling code DHL HEMLEVERANS PAKET (118)	Default text: EJ POD This is valid unless actual weight is over 20 kg or any of the following additional services are selected: Delivery with Id control or Personal delivery. Font size: Minimum 5 mm. EJ POD
C	11 Product features / Handling code Feature EUR Pallet exchange (PÖS)	Default text: PÖS followed by number of EUR pallets covered by pallet exchange. Font size: Minimum 5 mm. PÖS7
C	11 Product features / Handling code Additional service On-line appointm. booking	Field ResponseTextLabel from API response. Example: TID - 27/8 KL 09:00 - 11:00 TID - 27/8 KL 09:00 - 11:00
C	11b Committed delivery day (CDD) for product DHL ROAD FREIGHT PRIORITY (233)	Committed delivery day (CDD). Black text on white background. Font size: Minimum 4 mm. CDD: 2018-11-02 Please also see section 11.
C	11b Additional service Fixed delivery day (FDD)	Fixed delivery day (FDD). Black text on white background. Font size: Minimum 4 mm. FDD: 2018-11-09

API overview

10.2 **Appendix A - DHL ROAD FREIGHT DIRECT (205) min and max weight & dimensions**

The below information can be retrieved by Product API.

Minimum and maximum weight and dimensions etc		
	Piece	Shipment
Max number of pieces	-	999
Min actual weight (kg)	0,1	-
Min chargeable weight (kg)	-	2500,0
Min ch. weight 2500,0 kg equals:		
Actual weight		2500,0
or Cubic metres (cbm)		
DK, FI, NO		7,143
GB, IE		6,945
Other countries		7,508
or Loading metres (ldm)		
DK, FI, NO		1,25
GB, IE		1,25
Other countries		1,36
or a mix of weight and/or cubic metres and/or loading metres and/or long goods calculation if different calculation methods are used on piece level		
or if any piece has actual weight above 1000,0 kg (will be charged as minimum 2500 kg)	>1000,0 kg	
or if any piece has length above 299 cm, regardless of weight (will be charged as minimum 2500 kg)	>299 cm length	
or if any piece has height above 220 cm, regardless of weight (will be charged as minimum 2500 kg)	>220 cm height	
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	1360 x 240 x 290	-

Minimum and maximum weight and dimensions etc

Max actual weight (kg)	-	Please see table below
Max volume (cbm)	-	84,864
Max loading metres (ldm)	-	13,6 (Road train: 20,8)

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation

	1 cubic metre (cbm) equals	1 loading metre (ldm) equals
Countries DK, FI and NO	350 kg	2000 kg
Countries GB and IE	360 kg	2000 kg
Other countries	333 kg	1850 kg

Long goods chargeable weight calculation

A piece is calculated as long goods if length is ≥ 300 cm.

Countries DK, FI, GB, IE and NO	Piece width (cm)	Kg per length metre
	1 - 40 cm	417 kg per metre
	41 - 80 cm	667 kg per metre
	81 - 120 cm	1000 kg per metre
	121 - 160 cm	1333 kg per metre
	161 - 240 cm	2000 kg per metre
Other countries	Piece width (cm)	Kg per length metre
	1 - 40 cm	385 kg per metre
	41 - 80 cm	617 kg per metre
	81 - 120 cm	925 kg per metre
	121 - 160 cm	1233 kg per metre
	161 - 240 cm	1850 kg per metre

Example (a shipment to DK): If width is 110 cm and length is 600 cm, the volumetric weight is $6,0 \text{ m} \times 1000 \text{ kg} = 6000 \text{ kg}$.

Maximum actual weight per country

Country	Max weight	Country	Max weight	Country	Max weight
AD	25000 kg	GB	27000 kg	MK	24000 kg
AL	24000 kg	GE	21000 kg	MT	25000 kg
AM	21000 kg	GI	25000 kg	NL	25000 kg

38000 kg	FI

10.3 **Appendix B - Preferred package types for products 202, 205, 233 and 601**

The following list contains preferred package types for products DHL ROAD FREIGHT STANDARD (202), DHL ROAD FREIGHT DIRECT (205), DHL ROAD FREIGHT PRIORITY (233) and DHL HOME DELIVERY INTERNATIONAL (601).

The package types can be used for all products (except those with specific valid types specified).

Code	Definition	Description
BB	BOBBIN	Cylindrical-shaped object, normally with cable/cord/wire around it
BE	BUNDLE	Elongated/tube/rod-shaped objects fastened together; length ≤ 240 cm
BE2	LARGE BUNDLE (> 2.4 M LENGTH)	Elongated/tube/rod-shaped objects fastened together; length > 240 cm
BG	BAG/SACK	Large bag made of strong flexible material, normally designed to contain bulk substances
BL	BALE	Tightly pressed package of merchandise wrapped in strong flexible film
BX	BOX/CASE	Square or rectangular container with rigid sides; length ≤ 240 cm
BX2	LARGE BOX (>2.4 M LENGTH)	Square or rectangular container with rigid sides; length > 240 cm
CA	CAN	Closed cylinder-shaped container, normally designed to contain fluid substances
CG	CAGE	Container with barred sides, normally designed to contain multiple items
CLL	COLLI	Generic name referring to any type of handling unit without specifying it
CR1	CRATE (>1.2 M LENGTH)	Package in an outer wooden protective case or framework, sometimes with openings in-between the slates; length > 120 cm AND ≤ 240 cm
CR2	LARGE CRATE (>2.4 M LENGTH)	Package in an outer wooden protective case or framework, sometimes with openings in-between the slates; length > 240 cm
CT	CARTON/PACKAGE	Square or rectangular package with cardboard/corrugated cardboard sides, normally designed to contain comparatively light-weight goods

DR	DRUM/BARREL	Large cylindrical container with reinforced walls, normally designed to contain fluid substances
IBC	IBC (INTERMEDIATE BULK CONTAINER)	Reusable cubic-shaped tank container with an integrated pallet base
OC	OCTABIN	Pallet-size box normally designed to contain bulk or various packaged goods
PAL	INDUSTRY PALLET	Industrial pallet 120 x 100 cm
PLD	INDUSTRY PALLET - DOUBLE EXTRA LARGE	Industrial pallet 200 x 120 cm
PLH	HALF PALLET	Standardized pallet 60 x 80 cm
PLL	INDUSTRY PALLET - LARGE	Industrial pallet 120 x 120 cm
PLO	INDUSTRY PALLET - OVERSIZED	Industrial pallet 240 x 120 cm
PLX	INDUSTRY PALLET - EXTRA LARGE	Industrial pallet 160 x 120 cm
PLZ	INDUSTRY PALLET EURO SIZE	Industrial pallet 120 x 80 cm
QP	QUARTER PALLET	Quarter pallet 60 x 40 cm
RO	ROLL	Packaging formed by rolling up a product into a cylindrical shape
TE	TYRE	Ring made of rubber and/or metal surrounding a wheel

10.6 Appendix E - Phone number validation

In all occurrences of phone numbers, it is important that only valid formats can be entered.

The following prefixes and characters can be used in phone number fields:

0046 or +46 or 46 (first zero in area code must be removed)

0047 or +47 or 47 (ok with foreign country prefixes)

Notice that only one prefix can be used (not e.g. +0046)

Numbers (0 to 9)

Dash/hyphen character (-)

Space character ()

No other characters can be used in phone number fields. For example:

Letters (A-Ö / a-ö)

Slash character (/)

Point character (.)

[Back to Content](#)

10.7 Appendix F - How to use references

References are used for tracking, loading, delivery and invoicing. To provide adequate references is important. Any reference expected in an invoice must be sent in the shipment information. A reference can contain a maximum of 35 characters. To cover different needs, behaviour and usage of reference, DHL suggests these specific references to be used. In addition the customer is free to send in other references if needed.

Please notice that references with other qualifiers than CU and AAO are sent back in invoices only when e-invoice is used (i.e. these are not provided on paper or pdf invoices).

References	
Qualifier	Type of reference
AAO	Consignee reference
AAS	Shipment id
AAU	Pickup party reference
AEL	Unloading reference
AFN	Freight payer reference
AP	Invoice reference
CU	Consignor reference
DP	Delivery party reference
LO	Loading reference
RC	Routing code
SS	C.O.D reference

10.12.2 Return information label for product 402

DHL Home Delivery Return

Så här gör du när du ska skicka din vara i retur

1. Emballera dina varor
Emballaget ska vara av ett starkt och stöttåligt material som klarar normal godshantering, samlastning, automatsortering och lastsäkring.

Väger varan över 35 kg ska du ställa och fästa den på pall/lastbärare.

Tänk på att DHL inte tillhandahåller transportemballage.

2. Fäst adressetiketterna på dina varor
Fäst adressetiketten så att den är väl synlig och inte ligger vikt över en kant eller skymms av tejp, buntband eller liknande. En adressetikett per kolli. Nedan visas exempel på hur etiketten ska sättas fast.

OK

INTE OK

3. Boka upphämtning
När du emballerat och fäst adressetiketter på dina varor, vänligen kontakta DHL Freight's kundservice på **0771-345345** för att boka upphämtning. Tänk på att ha sändningsnumret (10 siffror) och sändningens mått (LxBxH i cm) till hands för en smidig bokning.

4. Förbered upphämtning
Placera varorna så att de är lättillgängliga för föraren att hantera vid tidpunkten för upphämtningen.

5. Kvittens
Be föraren kvittera denna lapp i samband med upphämtningen. Detta är ditt kvitto på att du har lämnat från dig varorna.
