2 Purpose of this document

The purpose of this document is to describe features and attributes for road based products for DHL Freight (Sweden). There are different limitations when it comes to business segment (B2B or B2C), geographical coverage, min and max weight, dimensions etc. Different additional services can be selected depending on transport product.

3 Versions of this document - dhldashboard.se

There are no fixed release plans for this document. An updated version will be published when changes in product features are done or when products are added or removed.

The latest version can always be found at www.dhldashboard.se.

Here you can also find Version history for the Product manual, EDI specifications, API models and other relevant information.

4 Scope

This manual covers the information needed for booking information (pickup request), transport instruction (shipment information) and mandatory documents. For information exchange, please see separate documentation and EDI message specifications.

4.1 Related documentation

Please notice that this document is only a summary of details concerning our products, additional services etc.

For more detailed products and services information - please visit DHL Freight website.

Most important is the latest version of "DHL Freight Sweden Terms and conditions" (English) or "DHL Freight Sweden Uppdragsvillkor" (Swedish). It is highly recommended that this is read as a complement to this document.

Max chargeable weight (kg)	-	2499,9

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight calculation			DHL EUROCONNECT (202)
	1 cubic metre (cbm) equals	1 loading metre (ldm) equals

5.7 **DHL STYCKE (211)**

	Product codes						Link to Products overview					
Domestic Sweden	102	209	210	211	212	103	104	118	401	501	402	502
International	112	202	205	232	233	SPI	PPI	109	107	601		

Minimum and maximum weight and dimensions etc			DHL STYCKE (211)
	Piece	Shipment	
Max number of pieces	-	99	
Min actual weight (kg)	0,1	-	
Max actual weight (kg)	1000,0	2500,0	
Min dimensions, L x W x H (cm)	15,0 x 11,0 x 3,5	-	
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	If weight is <50 kg: L: 599 W: 240 H: 220 If weight is ≥50 kg: L: 299 W: 240 H: 220	-	
Max length + circumference (cm)	-	-	
Max volume (cbm)	3,571	8,928	
Max loading metres (ldm)	0,51	1,28	
Max no. of pallet places (ppl)	1,2	3,2	
Max chargeable weight (kg)	-	2500,0	

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

If pallet place (pallplats) is used for volumetric weight calculation, 1 ppl equals 0,4 ldm.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation DHL STYCKE (211)		
1 cubic metre (cbm) equals 280 kg	1 loading metre (ldm) equals 1950 kg	1 pallet place (ppl) equals 780 kg

Long goods chargeable weight calculation DHL STYCKE (211)		
A piece is calculated as long goods if length is 300 - 599 cm & weight is <50 kg.		
	Piece width (cm)	Volumetric weight (kg)
	1 - 40 cm	200 kg
	41 - 80 cm	400 kg
	81 - 120 cm	600 kg
	121 - 160 cm	800 kg
	161 - 240 cm	900 kg
Example: If width is 140 cm and length is between 300 - 599 cm, the volumetric weight is 800 kg.		

Number of decimals DHL STYCKE (211)				
Weight	Volume	Loading metre	Pallet place	Dimensions (cm)
1	3	2	1	0

Product specific DHL STYCKE (211)
- Default product for shipments >999,0 kg - DHL PARTI. - If a shipment contains one or more pieces with height >220 cm it should be handled as a DHL PARTI (212) shipment, even if total weight is less than 1000,0 kg. - A piece is calculated as long goods if length is 300 - 599 cm.

Instructions DHL STYCKE (211)
Booking cancellation cannot be done electronically.

5.8 DHL PARTI (212)

Product codes						Link to Products overview						
Domestic Sweden	102	209	210	211	212	103	104	118	401	501	402	502
International	112	202	205	232	233	SPI	PPI	109	107	601		

Minimum and maximum weight and dimensions etc			DHL PARTI (212)
	Piece	Shipment	
Max number of pieces	-	999	
Min actual weight (kg)	0,1	-	
Min chargeable weight (kg)	-	1000,0	
Max actual weight (kg)	-	-	
Min dimensions, L x W x H (cm)	-	-	
Max dimensions, L x W x H (cm)	1200 x 240 x 270	-	
Max length + circumference (cm)	-	-	
Max volume (cbm)	-	150,000	
Max loading metres (ldm)	-	19,2	
Max no. of pallet places (ppl)	-	48,0	

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

If pallet place (pallplats) is used for volumetric weight calculation, 1 ppl equals 0,4 ldm.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation			DHL PARTI (212)
1 cubic metre (cbm) equals 280 kg	1 loading metre (ldm) equals 1950 kg	1 pallet place (ppl) equals 780 kg	

Long goods chargeable weight calculation

DHL PARTI (212)

A piece is calculated as long goods if length is ≥ 300 cm & weight ≥ 50 kg or if length is ≥ 600 cm.

	Piece width (cm)	Kg per length metre
	1 - 40 cm	325 kg per metre
	41 - 80 cm	650 kg per metre
	81 - 120 cm	975 kg per metre
	121 - 160 cm	1300 kg per metre
	161 - 240 cm	1950 kg per metre

Examples: If width is 140 cm and length is 400 cm & weight is 100 kg, the volumetric weight is $4,0 \text{ m} \times 1300 \text{ kg} = 5200 \text{ kg}$.

If width is 70 cm and length is 700 cm, the volumetric weight is $7,0 \text{ m} \times 650 \text{ kg} = 4550 \text{ kg}$.

Number of decimals

DHL PARTI (212)

Weight	Volume	Loading metre	Pallet place	Dimensions (cm)
1	3	2	1	0

Product specific

DHL PARTI (212)

- Maximum weight per piece and shipment is limited by the loading capacity of the truck and of the allowed maximum weight for the road.
- A piece is calculated as long goods if length is ≥ 300 cm and weight is $\geq 50,0$ kg or if length is ≥ 600 cm.
- In pickup request EDI message the following information is mandatory for DHL PARTI (212) shipments:
 - Complete name and address to physical pickup place.
 - At least address, postal code and city to physical delivery place.
 - Freight payer party including paying DHL account number.

Max loading metres (ldm)	-	1,24
Max no. of pallet places (ppl)	-	-
Max chargeable weight (kg)	-	2499,9
The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package. Chargeable weight is the greater of the actual weight of the goods and the volumetric weight. Chargeable weight per package is rounded up to the nearest whole kg. For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter. For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter. The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Product specific

DHL SERVICE POINT B2C (103)

- The delivery of the package can be carried out as follows:
 1. Picked up by receiver at a parcelshop (SERVICE POINT).
 2. Picked up by receiver at a parcelstation (box), accessed using a code.
- When the shipment is ready for pickup a notification will be sent to the consignee. It is mandatory to select either sms or e-mail to notify the consignee (not valid if additional service Pre-advice by letter is selected). Please notice that this should not be selected by adding an additional service. Mobile phone number or e-mail address must be sent according to EDI file specification. Please notice that the consignee will be notified by sms if both mobile phone number and e-mail address is sent. I.e. notification will not be sent by e-mail in that case.
- Maximum dimensions varies depending on delivery method. Please see tables above.
- To enable the receiver to return a package, a separate DHL SERVICE POINT C2B (104) shipment must be created.

Domestic Sweden	102	209	210	211	212	103	104	118	401	501	402	502
International	112	202	205	232	233	SPI	PPI	109	107	601		

Number of decimals					DHL PARCEL CONNECT (109)		
Weight	Volume		Loading metre		Pallet place		Dimensions (cm)
1	-		-		-		1

Product specific	DHL PARCEL CONNECT (109)
- Addressing can be made in two different ways depending on possibilities in delivery country: - Residential (home) addressing. - Access point (parcelshop or parcelstation/box) addressing. Please notice that selected addressing and actual delivery method may not have to correspond. E.g. if residential addressing is the only possible option, the delivery may still be done to a parcelshop or parcelstation. In some cases the consumer (receiver) can choose to have the delivery made to an access point even if addressing is made to residential (home) address. This option is handled in the pre-advice message that is sent after arrival to the receiving country. Please see appendix. - Minimum and maximum weight and dimensions varies depending on destination country and delivery method. Please see appendix. - The receiver is notified via e-mail and/or a text message. Possible pre-alert method varies depending on destination country and delivery method. Please see appendix. - Please notice that e-mail address to receiver is mandatory regardless of pre-alert method. - To enable the receiver to return a package, a separate DHL PARCEL RETURN CONNECT (107) shipment must be created. - The routing code that is written on the label (destination coded routing information) must also be transmitted as a specific reference in shipment instruction EDI file. In EDI file IFTMIN this should be sent in Sg 3 RFF with 1153=RC (please also see EDI specifications).	

Instructions	DHL PARCEL CONNECT (109)
- Addressing to country Ireland (IE): EIRCode (7 characters) should be used in field for postal code. If county is used, this should be sent in the same field as city (separated with comma character), e.g. CITY, COUNTY. - Documents needed to carry out the transport, such as customs documents, invoices etc must be sent by e-mail to dhlfreight.int.se@dhl.com. - Two copies of customs documents must also be attached on the outside of the package. - Booking cancellation cannot be done electronically.	

Valid countries DHL PARCEL CONNECT (109)

5.17 **DHL PARCEL RETURN CONNECT (107)**

	Product codes					Link to Products overview						
Domestic Sweden	102	209	210	211	212	103	104	118	401	501	402	502
International	112	202	205	232	233	SPI	PPI	109	107	601		

Product specific	DHL PARCEL RETURN CONNECT (107)
The routing code that is written on the label (destination coded routing information) must also be transmitted as a specific reference in shipment instruction EDI file (please see EDI specifications).	

Instructions	DHL PARCEL RETURN CONNECT (107)
This product can only be used when a DHL PARCEL CONNECT (109) shipment is to be returned to the original sender. The following preparations has to be performed: - A separate shipment with product DHL PARCEL RETURN CONNECT (107) has to be created. - This shipment should contain a unique domestic Swedish shipment number and a unique License plate. - The consignee/delivery address does not have to be equal to the sender address in the corresponding DHL PARCEL CONNECT (109) shipment. - A label has to be printed and sent to the original receiver, preferably bi-packed in the original package (i.e. the DHL PARCEL CONNECT (109) shipment). - In order to guide the consumer (sender), a brief instruction in local language should be printed on the label in section 16 'Customer Information'. Please see label section for texts to use per country. - If the shipment is to be returned from/to a non-EU country, a return form/proforma invoice has to be provided for customs purposes. - The shipment instruction has to be sent to DHL as EDI file. The data is then stored in our system for 180 days. If the package is not returned, the information will be removed.

5.19 DHL HOME DELIVERY (401) (501)

	Product codes					Link to Products overview						
Domestic Sweden	102	209	210	211	212	103	104	118	401	501	402	502
International	112	202	205	232	233	SPI	PPI	109	107	601		

Minimum and maximum weight and dimensions etc		DHL HOME DELIVERY (401) (501)
	Piece	Shipment
Max number of pieces	-	99
Min actual weight (kg)	0,1	-
Max actual weight (kg)	800,0	2500,0
Min dimensions, L x W x H (cm)	15,0 x 11,0 x 3,5	-
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	If weight is <50 kg: L: 599 W: 240 H: 220 If weight is ≥50 kg: L: 299 W: 240 H: 220	-
Max length + circumference (cm)	-	-
Max volume (cbm)	3,571	8,928
Max loading metres (ldm)	0,51	1,28
Max no. of pallet places (ppl)	1,2	3,2
Max chargeable weight (kg)	-	2500,0

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

If pallet place (pallplats) is used for volumetric weight calculation, 1 ppl equals 0,4 ldm.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation			DHL HOME DELIVERY (401) (501)
1 cubic metre (cbm) equals 280 kg	1 loading metre (ldm) equals 1950 kg	1 pallet place (ppl) equals 780 kg	

Long goods chargeable weight calculation		DHL HOME DELIVERY (401) (501)
A piece is calculated as long goods if length is 300 - 599 cm & weight is <50 kg.		
	Piece width (cm)	Volumetric weight (kg)
	1 - 40 cm	200 kg
	41 - 80 cm	400 kg
	81 - 120 cm	600 kg
	121 - 160 cm	800 kg
	161 - 240 cm	900 kg
Example: If width is 140 cm and length is between 300 - 599 cm, the volumetric weight is 800 kg.		

Number of decimals					DHL HOME DELIVERY (401) (501)
Weight	Volume	Loading metre	Pallet place	Dimensions (cm)	
1	3	2	1	0	

Product specific	DHL HOME DELIVERY (401) (501)
- The product code depends on whether the delivery is made via DHL operated terminal (401) or external terminal (501) and additional services selected by customer. - A piece is calculated as long goods if length is 300 - 599 cm. - Label layout differs for 401 and 501. - Phone number to consignee is mandatory.

Max chargeable weight (kg)	-	2499,9

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package. Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight calculation			DHL HOME DEL INTERNATIONAL (601)
	1 cubic metre (cbm) equals	1 loading metre (ldm) equals	
Countries DK, FI and NO	350 kg	2000 kg	
Countries GB and IE	360 kg	2000 kg	
Other countries	333 kg	1850 kg	

Number of decimals					DHL HOME DEL INTERNATIONAL (601)
Weight	Volume	Loading metre	Pallet place	Dimensions (cm)	
1	3	2	-	0	

Product specific	DHL HOME DEL INTERNATIONAL (601)
• This product can be used to and from Sweden. • Minimum and maximum weight and dimensions varies, depending on destination country. Please see table above. • Partloaded groupage/Direct injection (spridning) is a way of bulking consignments together. Only valid within the Nordic region. All shipments must be sent in one EDI file, with a dedicated EDI sender. • Phone number and e-mail address to consignee are mandatory. • Code for product in invoice files: HDI.	

Instructions	DHL HOME DEL INTERNATIONAL (601)
• Documents needed to carry out the transport, such as DGD/IMDG, customs documents, invoices etc must be sent by e-mail to dhlfreight.int.se@dhl.com. • Booking cancellation cannot be done electronically.

---------------------------------	--------------------------------

7 Customs

7.1 The parts of Customs

The Customs proceedings consists of a declaration in the land of departure (export declaration) and a declaration in the land of delivery (import declaration). The declarations are based on the financial transaction between the exporter and the buyer of the goods; i.e. the invoice. These declarations may be carried out by the customers themselves or by an agent e.g. DHL.

7.2 Contents of declaration

The declarations shall state name/number, date, amount and currency of the invoice. It shall also be stated if the invoice is used for payment (commercial) or for customs purposes only (pro forma).

Further the declaration shall state the country of origin of the goods and a procedure code to declare if this is a standard export or if the goods have been imported before (there are a number of different procedures). The declaration must contain at least one customs tariff number and specified net weight.

7.3 Id and trace of declaration

Each shipment declared is given a certain id to be used by customs (Customs id/Customs declaration number).

7.4 Countries and regions affected

For all shipments to be delivered outside the European Union, or the tax area, customs proceedings are mandatory.

Countries where DHL Freight delivers outside the European Union are CH, GB, GE, GI, LI, MK, NO, RS, RU, SM, TR and UA. Examples of areas outside the tax area are Åland Islands (FI 22) and Canary Islands.

Goods may be imported from other countries and held at storage without an import declaration. The declaration may be performed at the time of the delivery, hence a shipment that appears to be a domestic consignment or a delivery within the European Union, might actually be subject to customs proceedings.

7.5 Feature code (routing barcode) on label

The labels provided for a shipment where customs proceedings are mandatory must contain the routing barcode dedicated for customs handling.

7.6 Services provided by DHL Freight

When payer code Incoterm DDP or Combiterm 023 (the commercial invoice should state corresponding delivery term, e.g. Incoterm DDP) is used DHL can provide the service of declaration both in the land of departure and the land of delivery.

If payer code Incoterm CPT, CIP, DAP, DPU or Combiterm 022 (the commercial invoice should state corresponding delivery term, e.g. Incoterm DAP) is used DHL can provide the service of declaration in the land of departure.

The responsibility of the import declaration then falls on the Buyer of the goods in the land of delivery.

7.6.1 Customs handling - Overall instruction (for applications)

In the booking/shipment flow the service needs to be shown first. No pre-option.

The "Customs document details" and "Customs item information" fields used for additional service "Customs handling - Standard" should not be shown for user unless this service is selected.

Procedure selection of Standard- or Särskilt förfarande export, where Standard should be pre-selected.

Customs handling (Standard or Full service) must be selected when exporting to or importing from the following countries or regions:

CH, GB, GE, GI, LI, MK, NO, RS, RU, SM, TR, UA or FI with zip code 22.

7.6.2 Customs handling - Standard

This service is available if the customer provides all data necessary in the EDI file. A copy of the invoice must still be sent to DHL Freight. For details, please see additional service description.

7.6.3 Customs handling - Full service

If the customer wishes DHL to create the declaration without details in EDI file, it is possible to just send a copy of the invoice to DHL and let DHL do the rest. For details, please see additional service description.

7.6.4 Customs, joint declaration

Several shipments may be declared together, if the customer provides DHL with a summary invoice. A copy of the summary invoice must be sent to DHL. NB this service is only available for customers approved in advance. For details, please see additional service description.

7.6.5 Customs, customers own declaration

If the customer declares directly to customs or by another agent they need only to provide a customs id/customs declaration number via EDI and send a copy of the invoice. For details, please see additional service description.

8 Shipment- and package identifiers

8.1 *Calculation of check digit for License plate (SSCC GS1-128)*

Example Serial Shipping Container Code: 37399999123456789?

Begin by adding every second digit from the right.

Multiply the sum with 3.

$$\begin{array}{cccccccccccccccc} 3 & 7 & 3 & 9 & 9 & 9 & 9 & 9 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 \\ 3 & + & 3 & + & 9 & + & 9 & + & 1 & + & 3 & + & 5 & + & 7 & + & 9 & = & 49 & \times & 3 & = & 147 \end{array}$$

Add the rest of the digits.

$$7 + 9 + 9 + 9 + 9 + 2 + 4 + 6 + 8 = 54$$

Add both sums.

$$147 + 54 = 201$$

Subtract the total sum (201) from nearest higher 10th fraction, in this case 210.

$$\text{Solution: } 210 - 201 = 9$$

The check digit in this example is 9. (In case the sum is 10, the check digit is 0.)

The complete SSCC in this example is **373999991234567899**.

When SSCC is written in plain text, i.e. on labels, an application identifier (AI) should be added.

The application identifier for SSCC is (00).

Including AI, the complete code to be printed is (00)373999991234567899.

Please notice that the AI should NOT be included in the EDI file. It should only be printed on labels (in the barcode and plain text).

8.2 *Calculation of check digit for Swedish shipment Id*

Example shipment Id: 950048673?

Multiply the individual numbers in the shipment Id, all odd is multiplied with 2 and all even with 1.

Shipment Id		9	5	0	0	4	8	6	7	3
Multiples	x	2	1	2	1	2	1	2	1	2
Sums	=	18	5	0	0	8	8	12	7	6

Sum up all individual numbers. Notice that i.e. 18 should be treated as 1 + 8.

$$1 + 8 + 5 + 0 + 0 + 8 + 8 + 1 + 2 + 7 + 6 = 46$$

Subtract the total sum from the nearest higher 10th fraction, in this example 50.

$$50 - 46 = 4$$

The check digit in this example is 4. The complete shipment Id is **9500486734**.

When shipment Id is written in plain text (on documents and labels) it should be in format 950 048 673 4.

9 Transportation documents

Different documents are required for transportation. Examples can be found in separate documentation.

9.1 Domestic waybill

A standard waybill (SIS) is mandatory for non terminal based products in Sweden. Users should always have the possibility to print a copy of the waybill for their own purposes.

9.2 CMR - Convention relative au contrat de transport international de marchandise par route

A standard international waybill (CMR) is mandatory for non terminal based products outside Sweden. Users should always have the possibility to print a copy of the waybill for their own purposes.

9.3 End-of-day manifest / Shipment list

End-of-day manifest should be printed for terminal based products. If shipment instruction is sent to DHL via EDI the manifest does not have to include all shipment details. Please see appendix for example of layout and content.

9.4 Label

The label contains information of pickup and destination. It also contains information of identification (barcodes), routing, additional services and information relevant for sorting and handling.

9.4.2 Description of fields on label

The first column shows an indicator if the field is M=Mandatory, C=Conditional or O=Optional.

	Section	Comments																																											
	General	Use a clear font type like Arial, Courier, Helvetica or equal. Do not use italic, underlining or any other irregularity. Use black color characters on white background.																																											
C	1 CMR symbol	CMR logo (Convention on the Contract for the International Carriage of Goods by Road) is mandatory for all road transport between the European countries. If the printer does not support graphics, the letters 'CMR' can be printed as text. For domestic shipments within Sweden the following text may be written instead: INRIKES SVERIGE																																											
M	2 Transport product	DHL transport product with block letters. <table><tr><td>102</td><td>DHL PAKET</td></tr><tr><td>103</td><td>DHL SERVICE POINT</td></tr><tr><td>104</td><td>SERVICE POINT RETUR</td></tr><tr><td>107</td><td>PARCEL RETURN CONNECT</td></tr><tr><td>109</td><td>DHL PARCEL CONNECT</td></tr><tr><td>112</td><td>PARCEL CONNECT PLUS</td></tr><tr><td></td><td>Shipments to DE: DHL PAKET (CONNECT)</td></tr><tr><td>118</td><td>DHL HEMLEVERANS PAKET</td></tr><tr><td>202</td><td>DHL EUROCONNECT</td></tr><tr><td>209</td><td>DHL SPECIAL</td></tr><tr><td>210</td><td>DHL PALL</td></tr><tr><td>211</td><td>DHL STYCKE</td></tr><tr><td>212</td><td>DHL PARTI</td></tr><tr><td>205</td><td>DHL EUROLINE</td></tr><tr><td>232</td><td>DHL EUROCONNECT PLUS</td></tr><tr><td>233</td><td>DHL EURAPID</td></tr><tr><td>401/501</td><td>DHL HOME DELIVERY</td></tr><tr><td>402/502</td><td>HOME DELIVERY RETURN</td></tr><tr><td>601</td><td>DHL HOME DELIVERY INT</td></tr><tr><td>SPI</td><td>DHL STANDARD PALLET</td></tr><tr><td>PPI</td><td>DHL PREMIUM PALLET</td></tr></table> Font size: Minimum 5 mm.		102	DHL PAKET	103	DHL SERVICE POINT	104	SERVICE POINT RETUR	107	PARCEL RETURN CONNECT	109	DHL PARCEL CONNECT	112	PARCEL CONNECT PLUS		Shipments to DE: DHL PAKET (CONNECT)	118	DHL HEMLEVERANS PAKET	202	DHL EUROCONNECT	209	DHL SPECIAL	210	DHL PALL	211	DHL STYCKE	212	DHL PARTI	205	DHL EUROLINE	232	DHL EUROCONNECT PLUS	233	DHL EURAPID	401/501	DHL HOME DELIVERY	402/502	HOME DELIVERY RETURN	601	DHL HOME DELIVERY INT	SPI	DHL STANDARD PALLET	PPI	DHL PREMIUM PALLET

	Section	Comments
M	3 DHL Logo	Black and white DHL logo shall be used. 
M	4 Sender address	Consignor or pickup party name and address details. Font size: 2 mm.
M	5 Sender DHL account number	Consignor DHL account number. Heading: Account no. Font size: 2 mm.
M	6 Sender phone number	Consignor or pickup party phone number. Heading: Phone no. Font size: 2 mm.
C	VOEC Id	If VOEC apply then VOEC Id must be printed/written on package. Heading: VOEC Font size: 2 mm.
M	7 Receiver address	Consignee or delivery party name and address details, including country name in plain text on last row. Valid for all products: This field must be surrounded by marked corners, with the following characteristics: Line thickness: 1,0 mm. Line length: 10 mm. Quiet zone between address and corners: 5 - 10 mm. Font size: 3 mm.
	7 Receiver address DHL SERVICE POINT B2C (103)	Consignee name via SERVICE POINT " <i>name</i> " " <i>street</i> " " <i>postalCode</i> " " <i>cityName</i> " SVERIGE Text 'via SERVICE POINT' to be set by default. SERVICE POINT (parcelshop or parcelstation) details has to be acquired from ServicePointLocator API.

	Section	Comments
	7 Receiver address DHL PARCEL CONNECT (109)	<u>Shipments addressed to residential address (home address):</u> Consignee name and address details, including country name (in English): Name (c/o name) Street address Postal code and City Country (in English) <u>Shipments addressed to parcelshop or parcelstation:</u> The addressing should contain the following information from ServicePointLocator API response: Consignee name "name" "id" "shopName" "street" "postalCode" "cityName" "countryCode" (country name in English must be written) For shipments to country DE, "shopName" and "street" should not be printed. If the text from name, id and shopName is too long to be printed on one row, the name has to be truncated. It is not allowed to print an additional row.
	7 Receiver address Additional service Collection at terminal	Consignee name <i>c/o DHL Terminal Name</i> <i>DHL Terminal Address</i> <i>DHL Terminal Postal code and City</i> <i>DHL Terminal Country</i> Text 'c/o' to be set by default. DHL Terminal details has to be acquired from Terminal API.
	7 Receiver address DHL HOME DELIVERY (501)	Consignee name <i>via TERMINAL Distributing terminal Name</i> <i>Distributing terminal Address</i> <i>Distributing terminal Postal code and City</i> <i>Distributing terminal Country</i> Text 'via TERMINAL' to be set by default. Distributing terminal details has to be acquired from HomeDeliveryLocator API.

	Section	Comments
C	8 Receiver DHL account number or id	Consignee DHL account number. Heading: Account no. DHL account number mandatory for C2B products (104, 107, 402, 502). Valid for all products: Font size: 2 mm.
M	8 Receiver DHL account number or id DHL HOME DELIVERY (501)	Distributing terminal DHL partner id. Heading: PartnerId. Distributing terminal details has to be acquired from HomeDeliveryLocator API.
C	9 Receiver phone number	Consignee or delivery party phone number. Heading: Phone no. Font size: 2 mm.
	9 Receiver phone number DHL SERVICE POINT B2C (103)	Phone number to receiving parcelshop (SERVICE POINT). Heading: Phone no. Font size: 2 mm.
	9 Receiver phone number DHL PARCEL CONNECT (109) and DHL PARCEL CONN PLUS (112)	Due to security regulations concerning print of personal data, printing of phone number is only permitted on parcels to certain countries. For shipments to the following countries it is <u>not allowed</u> to print phone number to receiver: AT, BE, DE, ES, FR, GB, LU, NL, PT For shipments to the following countries it is <u>mandatory</u> to print phone number to receiver (if it is existing in shipment): BG, CZ, DK, EE, FI, HR, HU, IE, IT, LT, LV, NO, PL, RO, SI, SK
	9 Weight icon for DHL PARCEL CONNECT (109) and DHL PARCEL CONNECT PLUS (112) shipments to DE (over 10 kg)	From January 1st 2025 it is mandatory to print a weight icon on parcels with weight over 10 kg when destination country is Germany (DE). There are two different icons. One for parcels over 10 kg and one for parcels over 20 kg. Minimum size of symbol: 10 x 10 mm. Symbol should be placed to the right of the receiver address, outside the address corners (please see label section 7) and aligned with the lower address corner. Quiet zone: minimum 1 mm around icon and 3 mm to address corners. (As no phone number to receiver should be printed on labels to DE - please see above - there should be space for this symbol where phone number is normally printed.)

	Section	Comments	
	Icons	> 10 kg and <= 20 kg 	> 20 kg 
	9 Receiver phone number DHL HOME DELIVERY (501)	Phone number to Distributing terminal. Heading: Phone no. Font size: 2 mm.	
C	10 Manual sort instruction	Swedish domestic routing code (linjekod), with heading 'SE Domestic routing'. For export shipments the domestic routing code must be assigned to match the DHL gateway used for the export. The routing code can be up to 10 characters. The routing code can be acquired from PostalCode API (Route/Gateway). Routing code is <u>mandatory for the following products</u>: DHL PAKET (102) DHL SERVICE POINT B2C (103) DHL SERVICE POINT C2B (104) DHL PARCEL RETURN CONNECT (107) DHL PARCEL CONNECT (109) DHL PARCEL CONNECT PLUS (112) DHL HEMLEVERANS PAKET (118) DHL SPECIAL (209) DHL PALL (210) DHL STYCKE (211) DHL HOME DELIVERY (401/501) DHL HOME DELIVERY RETURN (402/502) Font size: Minimum 5 mm.	
C	11 Product features / Handling code	Codes connected to product features or additional services, white text on black background (reverse video). Valid for all products: If more than one feature/service is selected, a dash sign (-) has to be used as divider, e.g. AVI - LEV. If there is not enough space for codes/text to be used on one row it is ok to add another row. An alternative is to end the row with a plus sign (+) to indicate there are codes missing. Font size: Minimum 5 mm.	

	Section	Comments
M	11 Product features / Handling code DHL PARCEL CONNECT PLUS (112)	Default text per country. Font size row 1: Minimum 5 mm. Font size row 2: Minimum 3 mm. API overview

10.2 **Appendix A – DHL EUROLINE (205) min and max weight & dimensions**

The below information can be retrieved by Product API.

Minimum and maximum weight and dimensions etc		
	Piece	Shipment
Max number of pieces	-	999
Min actual weight (kg)	0,1	-
Min chargeable weight (kg)	-	2500,0
<u>Min ch. weight 2500,0 kg equals:</u>		
Actual weight	1000,0 *	2500,0
or Cubic metres (cbm)		
DK, FI, NO		7,143
GB, IE		6,945
Other countries		7,508
or Loading metres (ldm)		
DK, FI, NO		1,25
GB, IE		1,25
Other countries		1,36
or a mix of weight and/or cubic metres and/or loading metres and/or long goods calculation if different calculation methods are used on piece level		
or if any piece has actual weight above 1000,0 kg * (will be charged as minimum 2500 kg)	>1000,0 kg	
or if any piece has length above 299 cm, regardless of weight (will be charged as minimum 2500 kg)	>299 cm length	
or if any piece has height above 220 cm, regardless of weight (will be charged as minimum 2500 kg)	>220 cm height	
Max dimensions, L x W x H (cm) Please notice that not all maximum dimensions can occur at the same time, as this would transcend the maximum volume (cbm), loading metres (ldm) or pallet places (ppl)	L: 1360 W: 240 H: 290	-

Minimum and maximum weight and dimensions etc

Max actual weight (kg)	-	Please see table below
Max volume (cbm)	-	84,864
Max loading metres (ldm)	-	13,6 (Road train: 20,8)

The freight tariff is calculated on the chargeable weight of a shipment. For a shipment consisting of several packages, the chargeable weight of the shipment is the sum of the chargeable weight per package.

Chargeable weight is the greater of the actual weight of the goods and the volumetric weight.

Chargeable weight per package is rounded up to the nearest whole kg.

For goods with a maximum height of 1,25 meters, the volumetric weight is calculated according to cubic meter.

For goods where the cubic meter calculation cannot be applied (for example if the height is above 1,25 meters), the volumetric weight is calculated according to loading meter.

The loading meter is equal to the length of the goods (m) x the width of the goods (m) / 2,4.

Chargeable weight might also be calculated according to long goods calculation rules for the product.

Chargeable weight calculation

	1 cubic metre (cbm) equals	1 loading metre (ldm) equals
Countries DK, FI and NO	350 kg	2000 kg
Countries GB and IE	360 kg	2000 kg
Other countries	333 kg	1850 kg

Long goods chargeable weight calculation

A piece is calculated as long goods if length is ≥ 300 cm.

Countries DK, FI, GB, IE and NO	Piece width (cm)	Kg per length metre
	1 - 40 cm	417 kg per metre
	41 - 80 cm	667 kg per metre
	81 - 120 cm	1000 kg per metre
	121 - 160 cm	1333 kg per metre
	161 - 240 cm	2000 kg per metre
Other countries	Piece width (cm)	Kg per length metre
	1 - 40 cm	385 kg per metre
	41 - 80 cm	617 kg per metre
	81 - 120 cm	925 kg per metre
	121 - 160 cm	1233 kg per metre
	161 - 240 cm	1850 kg per metre

Example (a shipment to DK): If width is 110 cm and length is 600 cm, the volumetric weight is 6,0 m x 1000 kg = 6000 kg.

Maximum actual weight per country					
Country	Max weight	Country	Max weight	Country	Max weight

10.5 Appendix D - Phone number validation

In all occurrences of phone numbers, it is important that only valid formats can be entered.

The following prefixes and characters can be used in phone number fields:

0046 or +46 or 46 (first zero in area code must be removed)

0047 or +47 or 47 (ok with foreign country prefixes)

Notice that only one prefix can be used (not e.g. +0046)

Numbers (0 to 9)

Dash/hyphen character (-)

Space character ()

No other characters can be used in phone number fields. For example:

Letters (A-Ö / a-ö)

Slash character (/)

Point character (.)

[Back to Content](#)

10.6 *Appendix E - How to use references*

References are used for tracking, loading, delivery and invoicing. To provide adequate references is important. Any reference expected in an invoice must be sent in the shipment information. A reference can contain a maximum of 35 characters. To cover different needs, behaviour and usage of reference, DHL suggests these specific references to be used. In addition the customer is free to send in other references if needed.

Please notice that references with other qualifiers than CU and AAO are sent back in invoices only when e-invoice is used (i.e. these are not provided on paper or pdf invoices).

References	
Qualifier	Type of reference
AAO	Consignee reference
AAS	Shipment id
AAU	Pickup party reference
AEL	Unloading reference
AFN	Freight payer reference
AP	Invoice reference
CU	Consignor reference
DP	Delivery party reference
LO	Loading reference
RC	Routing code
SS	C.O.D reference

10.9 Appendix H - Overview additional services per product

10.9.1 B2B Domestic products

Additional service	Domestic products				
Carrying help pickup	102	209	210	211	212
Carrying help to room of choice	102	209	210	211	212
Cash on delivery (C.O.D)	102	209	210	211	212
Collection at terminal	102	209	210	211	212
Customs handling - Full service	102	209	210	211	212
Customs handling - Standard	102	209	210	211	212
Customs, customers own declaration	102	209	210	211	212
Customs, joint declaration	102	209	210	211	212
Dangerous goods	102	209	210	211	212
Dangerous goods, limited quantity	102	209	210	211	212
Delivery at Construction site	102	209	210	211	212
Del. monitoring - pickup	102	209	210	211	212
Del. monitoring - arr. at DHL term.	102	209	210	211	212
Del. monitoring - out for delivery	102	209	210	211	212
Del. monitoring - delivered	102	209	210	211	212
Del. monitoring - coll. by receiver	102	209	210	211	212
Del. monitoring - not coll. by rec.	102	209	210	211	212
Delivery with Id control	102	209	210	211	212
Delivery without Id control	102	209	210	211	212
Delivery without POD (Proof of Del.)	102	209	210	211	212
DHL Insurance	102	209	210	211	212
EUR pallet exchange	102	209	210	211	212
Evening delivery	102	209	210	211	212
Evening delivery zone B	102	209	210	211	212
Evening delivery zone C	102	209	210	211	212
Evening delivery zone D	102	209	210	211	212
Evening delivery zone E	102	209	210	211	212
Fixed delivery day	102	209	210	211	212
Freight subsidy	102	209	210	211	212
Green Freight	102	209	210	211	212
Hardcopy POD (Proof of Delivery)	102	209	210	211	212

Additional service	Domestic products				
Indoor delivery	102	209	210	211	212
Installation	102	209	210	211	212
Installation advanced	102	209	210	211	212

10.12.2 Return information label for product 402

DHL Home Delivery Return

Så här gör du när du ska skicka din vara i retur

1. Emballera dina varor
Emballaget ska vara av ett starkt och stöttåligt material som klarar normal godshantering, samlastning, automatsortering och lastsäkring.

Väger varan över 35 kg ska du ställa och fästa den på pall/lastbärare.

Tänk på att DHL inte tillhandahåller transportemballage.

2. Fäst adressetiketterna på dina varor
Fäst adressetiketten så att den är väl synlig och inte ligger vikt över en kant eller skymms av tejp, buntband eller liknande. En adressetikett per kolli. Nedan visas exempel på hur etiketten ska sättas fast.

OK

INTE OK

3. Boka upphämtning
När du emballerat och fäst adressetiketter på dina varor, vänligen kontakta DHL Freight's kundservice på **0771-345345** för att boka upphämtning. Tänk på att ha sändningsnumret (10 siffror) och sändningens mått (LxBxH i cm) till hands för en smidig bokning.

4. Förbered upphämtning
Placera varorna så att de är lättillgängliga för föraren att hantera vid tidpunkten för upphämtningen.

5. Kvittens
Be föraren kvittera denna lapp i samband med upphämtningen. Detta är ditt kvitto på att du har lämnat från dig varorna.
